

1 Abstract of the Disclosure

2 A method of preparing for hunting comprises applying a quantity of a toothpaste to the
3 hunter's teeth, the toothpaste formulated to contain no added scents or odors. The
4 formulation provides hunters with the ability to practice their normal tooth brushing routine,
5 but without adding a scent, which if detected by the prey animal, could compromise the
6 hunter's objective of being scent free to avoid detection by the prey while hunting. An
7 embodiment comprises a mixture of calcium carbonate, a polyol; water; sodium bicarbonate;
8 sodium lauryl sulfate; titanium dioxide; guar gum, and sodium saccharin.
